LFM2.5-Encoder-350-Prompt-Router

A full fine-tune of [LFM2.5-Encoder-350M](#) with a zero-shot routing head that scores a prompt against user-defined routing lanes in a single encoder pass.

Find more details about our encoders in our [blog post](#).

Demos: Try this fine-tuned model running in a CPU-only Hugging Face space: [Zero-shot prompt routing](#) — define your own routing lanes as free text. The model scores the whole prompt against every lane in one pass.

LiquidAI/prompt-routing

“⚠️ Loads custom code via `trust_remote_code=True` (the model wraps a `trust_remote_code` encoder).”

Install the required packages:

```
pip install torch transformers
```

Run zero-shot prompt routing:

```
from transformers import AutoModel, AutoTokenizer

model_id = "LiquidAI/LFM2.5-Encoder-350-PromptRouting"

tokenizer = AutoTokenizer.from_pretrained(model_id)
model = AutoModel.from_pretrained(model_id, trust_remote_code=True)

routes = ["Coding", "Sales", "Creative writing"]
prompt = "Can you help me debug a failing Python script?"

print(model.route(prompt, routes, tokenizer=tokenizer))
```
